
why: which Claims a sentence rests on (Claim IDs written by Judgement, checked against the Claims it was given). **where**: the exact source, character range and page, reproduced by the system.
Binding state of a sentence: **bound** (all linked Claims resolve) · **mixed** · **unbound** · **no_claim**. Optional warning layer (Sect. 4.6): each bound Claim may also carry `supported` / `not_supported` / `unassessed`; it is displayed, never used to filter, never sent to a model.
